Go to https://www.agilitycanic.cat/ca/

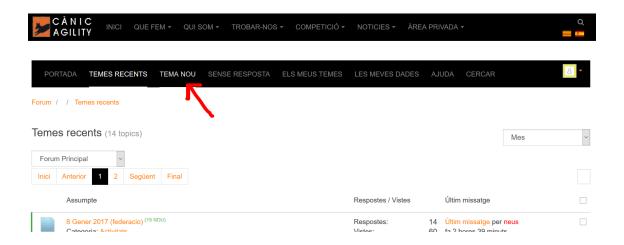

Select the Area Privada option and there the Accedir option:

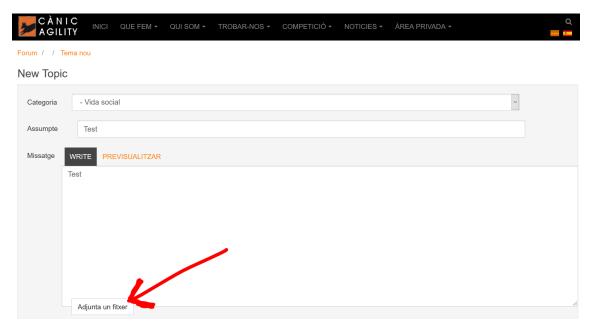

Use username and password provided and after Connected select Fòrum del Canic

That gives you to the kunena fòrum home page. There select Tema Nou:

There put Test on heading and text and try to attach a file clicking on Adjunta un fitxer:

That before opened a popup where you can select the file to load but now it does nothing.

I've verified that the option to attach files is avalaible (on kunena definition) and it worked sometime ago, but now is not working.

Maybe on the log file I have some information about what's happening but I don't know how to check it.

I can't get any suport from Kunena (I don't know why but I can'r post a request there). Any help will be really appreciated
