

This are the sourcecodes of two nearly exact the same sites with Joomla 3.7 and t3\_b3 – template.

This is the dynamically generated source code, where with the incorrect editor, i.e. without tabs

```
▼<div id="t3-content" class="t3-content col-xs-9"> == $0
  ▼<div class="edit item-page">
    ▼<form action="/index.php/article2?a_id=0" method="post" name="adminForm" id="adminForm" class="form-validate form-vertical">
      ▼<fieldset>
        ▼<ul class="nav nav-tabs" id="com-content-formTabs">
          ::before
          ::after
        </ul>
        ▶<div class="tab-content" id="com-content-formContent">...</div>
        <input type="hidden" name="task" value>
        <input type="hidden" name="return" value>
        <input type="hidden" name="b05145999a28d2efd670fe766263d918" value="1">
      </fieldset>
      ▶<div class="btn-toolbar">...</div>
    </form>
  </div>
</div>
<!-- //MAIN CONTENT -->
```

This is the dynamically generated source code, where with the correct editor, i.e. with tabs. Here you can see the list for the tabs (“editor”, “publishing” ) , in the upper case there is no such list.

```
▼<div id="t3-content" class="t3-content col-xs-12"> == $0
  ▶<script type="text/javascript">...</script>
  ▼<div class="edit item-page">
    ▶<div class="page-header">...</div>
    ▼<form action="/index.php/article?a_id=0" role="form" method="post" name="adminForm" id="adminForm" class="form-validate">
      ▼<fieldset>
        ▼<ul class="nav nav-tabs">
          ::before
          ▼<li class="active">
            <a href="#editor" data-toggle="tab" aria-expanded="true">Editor</a>
          </li>
          ▼<li class="">
            <a href="#publishing" data-toggle="tab" aria-expanded="false">Veröffentlichen</a>
          </li>
          ▶<li class="">...</li>
          ▶<li class="">...</li>
          ::after
        </ul>
        ▶<div class="tab-content">...</div>
        ▶<div class="btn-toolbar">...</div>
        <input type="hidden" name="be046ab3af5e8949eb175ced7302d673" value="1">
      </fieldset>
    </form>
  </div>
</div>
<!-- //MAIN CONTENT -->
```
